Experience and projects:

TOGKF Moldova Website:

Team of 4 members. I am involved in project implementation, front-end design, and development of reusable React components.

Corporate application project:

Team of 3 members. Developed reusable React components. Implemented file sorting and searching functionality. Built pagination and navigation features. Created a project library of UI components. Wrote unit and integration tests for the components.

Personal Websites:

I was working on a single-page personal website. Responsible for design and development. Tech stack: React, JavaScript, Tailwind CSS, and etc.

These projects allowed me to expand my website design and development skills and gain experience working with a team of developers.

What I'm Looking For:

I aim to deepen my knowledge and skills in frontend development, so I am seeking a position in a product-oriented company. I want to be part of a team that is focused on product development and have the opportunity to be involved in the entire development lifecycle.

I want to join a friendly and cohesive team that can provide me with valuable learning experiences. I am open to working with various technologies, frameworks, and tools. If a project is built on a different framework, I am ready to adapt and learn it quickly. I have experience with React and Next.js and CSS frameworks like Tailwind CSS, Bootstrap, and Chakra UI. I am also familiar with state management using Redux and Recoil.

I have basic knowledge of backend development and a good understanding of its fundamentals. I'm working with JavaScript and TypeScript and have basic knowledge of Python. In terms of databases, I've worked with PostgreSQL and MongoDB. I've used Firebase (Google Cloud) in recent projects as a platform. However, my main focus and interest lie in frontend development.

About Me and Previous Experience

Before embarking on my journey as a developer, I worked as a lawyer for over six years. During this time, I reached the position of Head of the Legal Department in an international company and gained valuable experience that will be beneficial in my future work.

I had the opportunity to negotiate with international partners and represent the company's interests in court and government bodies. I have extensive experience working in teams, both as a project leader and under the guidance of more experienced colleagues. I have also served as a mentor for interns undergoing training in the company on two occasions.

My previous work has helped me develop valuable qualities such as resilience to stress, attention to detail and deadlines, and the ability to assess my situation under any circumstances.

Education

Bachelor's degree in Law, Plekhanov Russian University of Economics, Moscow

September 2013 – June 2016

SKILLS

Languages:

JavaScript, TypeScript, Python, HTML, CSS
